**IRELAND** 

Spring Advice

Broadway® Star for control of wild oats, ryegrass, bromes and broad-leaved weeds in winter wheat, winter rye, winter triticale.

## **Key facts**

Product Registration Number:	PCS 05582			
Active Ingredient:	14.2g/kg florasulam + 70.8 g/kg pyroxsulam			
Pack size:	1.06 Kg (4 hectares)			
Formulation:	Water Dispersible Granule			
Maximum Individual Dose:	265 g/ha			
Maximum Number of Applications:	1 per crop			
Application Timing:	GS11-32 inclusive			
Water Volumes:	100-200 Litres water/ha. Optimum 130-150 Litres water/ha			
Buffer:	5m aquatic			
Spray Quality:	FINE to Medium as defined by BCPC			
Nozzles:	Spring applications supported: CFF, VPFF, Twin Fluid and Air Inclusion			

#### Best Use Advice - Spring

- Has a wide window of application up to crop GS32 inclusive
- Suitable for early spring control of wild oats (GS11-31 (optimal up to GS29)):
  - Control was missed in the autumn
  - A pre-emergence product was not applied or was ineffective
  - Grassweeds have germinated in the spring
- Can be applied at 210 g/ha for control of wild oats up to GS29
- Suitable for control of spring germinating bromes, Meadow, Soft and Rye brome (GS11-24)
  - Optimally following after an effective pre-emergence
- Ryegrass (from seed), Sterile and Great brome control is best achieved in the autumn Apply Broadway Star in a programme following an effective pre-emergence herbicide, in tank mix with a residual partner when the ryegrass is between GS11-29 or the brome is between GS 11-24 (optimal GS 11-13) and actively growing
- Apply Broadway Star at 265 g/ha with an approved adjuvant:
  - Abacus, Activator 90, Bio Syl, Buzz, Drill, Cogent, Felix, Fieldor Max, Headland Diamond, Headland Fortune, Intracrop Tonto, Intracrop Warrior, Kantor, Roller, Spartan, Spryte Aqua, Torpedo II and Viking
- Apply during periods of active growth, avoiding periods of frost and large diurnal temperature fluctuations
- For optimal grassweed control use as part of a programme and follow WRAG guidelines
- No cultivation restrictions prior to sowing following crops:
  - Autumn: Winter wheat, barley, oats, triticale and rye, oilseed rape, grass, winter beans, brassica plants as
  - Spring: Spring wheat, barley, oats, triticale, rye and oilseed rape, sugar beet, potatoes, grass, clover (as part of a grass/clover ley), beans, peas, maize, linseed, brassica plants as transplants, carrots, parsnips
- Rainfast in 1 hour
- To avoid subsequent injury to crops other than wheat, rye and triticale, spray equipment used for Broadway Star applications should be thoroughly cleaned with All Clear Extra.

#### Tank Mixing

- If conditions are suitable for applications of Broadway® Star, adding a residual is generally beneficial in the programmes until the end of February, providing soils still hold enough moisture. Broadway® Star needs the target weed to be actively growing with the soil temperature measured at 10 cm deep ideally higher than 6°C for 2-3 days either side of the application and 7-day mean air temperature >8ºC.
- Once soils dry up in the spring, Broadway Star must not be mixed with a residual and a minimum of 4 weeks must be left between the applications. The purpose of the 4 weeks gap is to allow weeds to fully recover again after the residual shock and be actively growing at the time of the pyroxsulam application.
- Broadway Star + adjuvant is physically compatible with a wide range of crop protection products including herbicides, fungicides and micro-nutrients.
- Can be used with chlormequat PGRs at half dose rate. Other PGRs or higher doses require a 7-day interval
- Refer to https://www.corteva.ie/tools-and-advice/tank-mixes.htmlfor further information.

#### Weed Spectrum

- Always use Broadway Star in combination with an approved adjuvant
- The market standard for ryegrass control (GS11-29) and brome control (GS11-24) at 265 g/ha
- Outstanding wild oat control (GS11-24) at 210 g/ha

Weed	210 g/ha + adjuvant	265 g/ha + adjuvant	Weed	210 g/ha + adjuvant	265 g/ha + adjuvant
Black bindweed	MS 4tl	4 tl	Mouse-ear chickweed	MS 4 tl	MS 100 mm
